

# Integral Sideshift Fork Positioner

Attollo's integral sideshift fork positioner offers the benefits of improved forklift specifications and reduced long term maintenance costs. The ability to offer a robust unit that fits standard ISO hook on forks without modification.

The design offers optimised visibility and maintains maximum view through the frame for greater safety and productivity.

The ISO mounting profiles and guide profiles are manufactured from one piece which gives a high degree of rigidity. The high wear resistant sliding profiles, can when necessary, be replaced quickly and easily on site without the use of special tools.

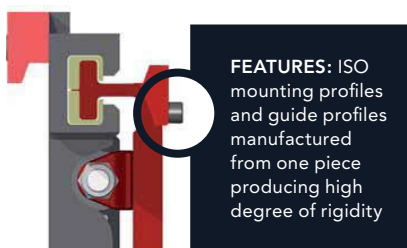

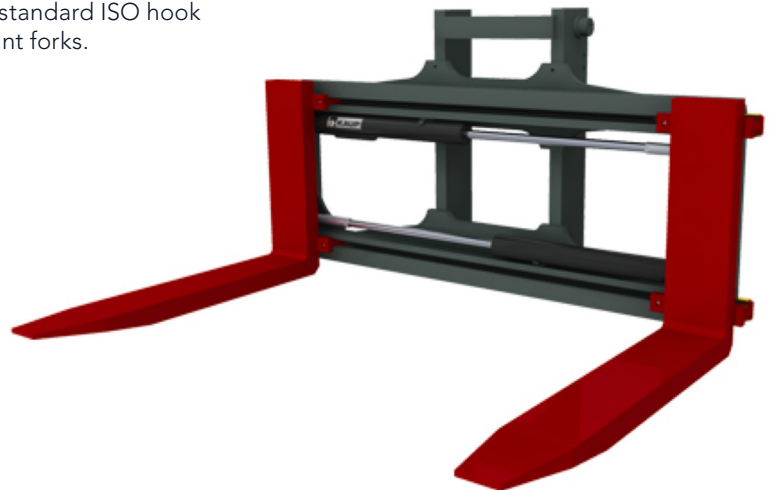

Unlike conventional fork positioners, Attollo's model positions the fork on sliding profiles without wear and tear or damage to the forks and carriage. Keeping the forks rigid on the carriage.

## Features

- ▶ Excellent visibility
- ▶ Designed to handle arduous applications
- ▶ Replaceable sliding profiles
- ▶ Lubrication points easily accessible for maintenance.
- ▶ Sideshifting through separate cylinder improving stability plus wear and tear
- ▶ Fits standard ISO hook mount forks.

## Options

- ▶ Different capacities available
- ▶ Different opening ranges
- ▶ Different fork options
- ▶ Bolt on forks
- ▶ Valve block sideshift.

**FEATURES:** ISO mounting profiles and guide profiles manufactured from one piece producing high degree of rigidity
